

A huge thank you to the Davey Derby crew for the generous donation to help with the purchase of "The Vest" airway clearance system for our son John Hieta. John has Cystic Fibrosis and it is a constant battle to keep his lungs free of a thick mucus that people with CF struggle with on a daily basis. We hope that along with the physio treatments that we are already doing with John the Vest will improve his lung function. We really appreciate what you have done for our family as well as the many other people that you donate to. John Hieta Sr. has been going to the derby since the first one and will continue to support it for as long as it continues.

Thanks again,

John, Jodi, John & Hunter Hieta
